## Wednesday Challenge Form

Group Members: Peter, Moses, Justin, Yong Hyun

Problem Statement: Create a doorstep

### Approach:

We thought at first to use magnets, but thinking about it, Yong thought that it would have used more power for the person at the door. So, we changed it to bungee cords.

I wanted a design that would be more subtle... but, Yong and Justin like the simplistic approach. Not blaming them of course.

Solution: People like to do little work! Just find The best solution to accommodate this.

Lessons Learned: Simple approach is good... but you must put yourself in your customers shoe's.
